EDUCATION

Bachelor of Science in Computer Science Modern Academy

12/2019 - 08/2023

Maddi, Cairo

WORK EXPERIENCE

Backend Developer internship itrax academy

01/2020 - 02/2021

Achievements/Tasks

- APIs · Design Patterns · MVC · PHPUnit · MySQL · PHP · Laravel

Software Engineer internship ALX

03/2023 - Present

Achievements/Tasks

- DevOps - Unix - Git & command line editors - Bash - Shell - C Programming Language - Python - Data structures and algorithms - HTML/CSS - SQL - MySQL - NoSQL - Redis - JavaScript - SSH - Web server - React - TypeScript - APIs - Unit Test

Machine Learning internship Huawei

09/2022 - 10/2022

Achievements/Tasks

- Researched and evaluated various algorithms for image recognition using deep learning techniques. Developed a predictive model to analyze customer churn data and reduced customer attrition by 20%. Conducted experiments to optimize hyperparameters for a natural language processing application and achieved 90% accuracy in sentiment analysis. Implemented a decision tree algorithm for fraud detection in financial transactions, resulting in a 95% accuracy rate.

SKILLS

PERSONAL PROJECTS

Content Management System (01/2020 - 06/2020)

- Content Management System Multi Themes Website With Dashboard For (User - Admin - Suber Admin) By Using PHP Native (Multi Language - Multi Authentication - Multi Themes)

Invoices System (POS) (09/2021 - 06/2021)

- Multi Language - Multi Authentication - Multi Themes - Ready To API - Real time - Easy UI

Blog System (08/2022 - 01/2023)

- Multi Language - Multi Authentication - Multi Themes - Ready To API - Real time - Chat Real time(Livewire) - Easy UI

Plant Analyzer (09/2022 - 06/2023)

- plant Analyzer is The First project makes Instance Segmentation By Using Yolov8 Model To Detect on Wheat Diseases. (CNN MODEL - YOLOv8 MODEL - New Dataset - Flutter App UI - Python And Flask Framework - FastAPI)
