Mohamed Ashraf Sobhy

Software Engineer | Full-Stack Developer (Laravel & PHP | Next.js/React | AI/ML)
Cairo, Egypt (9 Street, 11571) | Phone: +20 1116609208 | Email: dodm773@gmail.com
LinkedIn: linkedin.com/in/mohamed-ashraf-sobhy-562026222 | GitHub: github.com/mohamedgika

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with experience designing, developing, and deploying scalable web applications and APIs using PHP, Laravel, and Next.js. Skilled in RESTful and SOAP API development, MySQL/MongoDB database management, Docker containerization, and CI/CD automation with Jenkins. Background in AI and machine learning, including model development with TensorFlow, PyTorch, and Flask API deployment. Proven track record building e-commerce platforms, freelance marketplaces, and mobile applications with real-time features and secure payment integration.

TECHNICAL SKILLS

Languages: PHP, JavaScript, Python, C, C#, C++, Java, HTML, CSS, SQL

Web Frameworks & Libraries: Laravel, Livewire, Filament, Next.js, React.js, jQuery, Bootstrap, Tailwind CSS, WordPress

APIs & Architecture: RESTful APIs, SOAP APIs, MVC, ORM/ODM, Design Patterns, SOLID Principles, Repository Pattern, WebSocket (Pusher), CORS

Databases: MySQL, MongoDB, Redis, Memcached, NoSQL, SQL

DevOps & Cloud: Docker, Jenkins CI/CD, Git, Bash, Nginx, Apache, AWS, Azure, Google Cloud, LAMP/LEMP Stack

Tools & Practices: Postman, Npm, Yarn, Jira, Agile, DevOps, PHPUnit, Ajax, Data Structures

Artificial Intelligence & ML: Python, Machine Learning, Deep Learning, LLMs, TensorFlow, PyTorch, Keras, FastAPI, Flask, Data Preprocessing and Cleaning, Linear Algebra, Probability and Statistics, Model Deployment

PROFESSIONAL EXPERIENCE

IT Specialist — GIG Egypt Company (Full Time)

December 2023 – Present

- Analyzed business processes within the Microinsurance Department and delivered technical solutions for issuance, claims, and collections through a custom-built microinsurance system.
- Digitized manual processes, reducing processing time and improving overall operational efficiency.
- Designed, developed, and maintained RESTful and SOAP APIs for seamless system integration.
- Applied design patterns and MVC architecture in PHP (Laravel, Livewire, Filament) with OOP principles to ensure scalable, maintainable solutions.
- Developed and refined business workflows by translating operational requirements into technical solutions.
- Created and maintained comprehensive technical documentation for systems, APIs, and workflows to support knowledge transfer and maintenance.
- Managed and optimized MySQL databases and implemented PHPUnit testing to ensure software quality.
- Deployed applications in Docker containers with Nginx web server configurations.
- Automated deployment workflows using CI/CD pipelines in Jenkins.
- Coordinated with cross-functional teams via Jira for task tracking and project management.

Backend Developer — Webetr Company (Part Time)

April 2023 – September 2023

- Built and maintained RESTful and SOAP APIs using PHP and Laravel following MVC architecture and OOP principles.
- Implemented microservices for payment integration and shipment integration.
- Applied design patterns and PHPUnit testing to deliver reliable, maintainable code.

- Deployed applications with Docker and Nginx, and managed CI/CD pipelines using Jenkins.
- Collaborated with the team using Git/GitHub, Bash, and Jira for version control and task tracking.

Full Stack Developer Intern — itrax academy
September 2019 – 2022

- Developed full-stack web applications using PHP, Laravel, MySQL, HTML, CSS, Bootstrap, React.js, jQuery, and AJAX.
- Built and consumed REST APIs and applied MVC architecture and design patterns with OOP principles.
- Used PHPUnit for testing and Bash/Git for version control.

Machine Learning Intern — Huawei
July 2022 – 2022

- Researched and evaluated deep learning algorithms for image recognition tasks.
- Developed a predictive model for customer churn analysis, reducing attrition by 20%.
- Conducted hyperparameter optimization for an NLP sentiment analysis application, achieving 90% accuracy.
- Implemented a decision tree algorithm for financial fraud detection, reaching 95% accuracy.

Secure Intelligence — Ericsson
April 2023 – 2023

- Designed and implemented techniques to secure AI models against unauthorized access and manipulation.
- Developed and deployed secure servers for hosting machine learning models.
- Researched and applied model protection methods to prevent reverse engineering and intellectual property theft.
- Explored and tested AI security techniques to ensure model integrity and reliability during deployment.

PROJECTS

Producer App — producer-frontend-nextjs.vercel.app
Next.js, MySQL, Laravel, PHP, Firebase, RESTful & SOAP APIs, WebSocket (Pusher), PayPal, Nginx

- Developed a freelance marketplace mobile application connecting service providers and requesters, and enabling users to list products for rent or sale.
- Implemented features for creating posts, browsing services, and facilitating transactions between users.
- Integrated real-time communication via WebSocket (Pusher) for instant messaging and live updates.
- Enabled secure payment processing using PayPal, supporting both service and product transactions.
- Applied the Repository design pattern to ensure scalable, maintainable architecture.
- Deployed on a VPS server with robust backend integration using RESTful and SOAP APIs.

Calma App — calmaapp.com
Flutter, MySQL, Firebase, RESTful & SOAP APIs, WebSocket (Pusher), PayPal, Apache2

- Built a Flutter mobile application enabling users to reserve virtual stadiums and participate in live sports broadcasts with integrated live chat.
- Implemented real-time communication using WebSocket (Pusher) and integrated secure payment processing via PayPal.
- Designed with the Repository design pattern and deployed on a shared Apache2 server.

Carty Store — cartyi.com
PHP (Laravel), MySQL, Nginx Alpine, RESTful & SOAP APIs, Redis, Docker, Jenkins CI/CD, Cloudflare

- Developed a multi-tenant e-commerce system similar to Salla.sa and Bagisto.
- Engineered multi-tenant SQL architecture for scalable and secure data isolation.
- Integrated payment and shipment microservices for seamless transactions.
- Deployed using Docker with automated CI/CD pipelines on a VPS.

Cars Store (CMS)
PHP Native, MySQL

- Created a multi-language content management system with role-based authentication (Admin/User).
- Integrated payment methods, APIs, real-time features, and customizable UI themes.
- Delivered a fully tested solution with secure authorization mechanisms.

Gabal News (Blog System)
PHP (Laravel), MySQL, Livewire

- Built a multi-language news platform with role-based multi-authentication (Admin/User).
- Implemented dynamic content management, real-time notifications, and live chat using Livewire.
- Integrated an external News API for content automation.

Souq (Invoices System)
PHP (Laravel), MySQL, Livewire

- Developed a multi-language invoicing system with role-based authentication and authorization policies.
- Implemented real-time notifications, live chat, and PDF/Excel invoice generation.
- Integrated payment methods for online transactions.

Plant Analyzer — Wheat Diseases Detection (Graduation Project)
Python, Flask, Deep Learning, Flutter, YOLOv8, Roboflow

- Developed the first instance segmentation system for wheat disease detection using the YOLOv8 model.
- Built a 22-layer CNN for feature extraction from plant images.
- Utilized Roboflow for image annotation and dataset preprocessing.
- Integrated the trained CNN model with a Flask API for mobile app connectivity.
- Designed and deployed a Flutter mobile app to predict wheat diseases from uploaded images and provide detailed treatment guidelines.

EDUCATION

Bachelor of Computer Science — Modern Academy for Computer Science & Information Technology
Graduated: July 2023

CERTIFICATIONS

- IT Project Management — Indian School of Business
- API Crash Course: How to Create, Test, & Document your APIs — Udemy
- The Complete Flutter Development — Udemy
- Backend PHP & SQL — Information Technology Institute (ITI)
- Network Security & Database Vulnerabilities — IBM
- HUAWEI AI & Machine Learning — Ministry of Youth & Sports of Egypt and Huawei
- Internet of Things — IBM
- Cybersecurity Compliance Framework & System Administration — IBM
- Cybersecurity Roles, Processes & Operating System Security — IBM
- IT Fundamentals for Cybersecurity Specialization — IBM
- Introduction to Cybersecurity Tools & Cyber Attacks — IBM
- Practical Cisco Networking Labs in Cisco Packet Tracer — Cisco Networking Academy
- IT Technical Support Fundamentals — Google
